

Meeting minutes 9/19/2019

We mainly discussed accountability for secondary officers. As of right now Lucy has check in papers at different locations for the officers when they are doing secondary. We met with the owner of Campbell's Security and he is in agreement that accountability needs to take place. Some suggestions we had are:

- Keeping the check in points.
- Getting a check in system where the police officers have to touch a wand to a check in point so we can track it electronically.
- Getting a gps system, which Campbell's might purchase if pushed on our end.
- Having the officers approach more prostitution areas and prostitutes. Asking for names and trying to deter them away from the area.
- Getting pictures of license plates on johns and others involved.

Campbell's owner did say that Captain Moore has been helpful and they have been working together.

We need to vote on whether to possibly use the expense on gps for the officers or push Campbell's to get it on their own. We also have the option for just a check in system.

Until it is figured out or until we decide to stop, Lucy will continue to have the check in places for accountability.
